

About consultation during the state of emergency declaration

2021/07/29

Considering the infectivity of the mutant strain of the new corona, from August 2, patients who visit our hospital during the issuance of a state of emergency will be treated as "only patients who visit".

Please do not visit the hospital even if you need an attendant (those who do not understand Japanese or need assistance) or children.

If it is difficult for you to see the doctor alone, we recommend that you delay the timing of the consultation.

Please contact us by phone regarding the intervals between pregnant women's medical examinations and in case of emergency treatment.

Please understand that we will do so without exception to ensure fairness. As a hospital that manages pregnant women and babies, we will tighten the restrictions.

We appreciate your understanding and cooperation.

Please check our homepage as the correspondence changes daily.

From Sannoh clinic director
